Appendix G

Source code of the Aquarius Prolog compiler

‘‘A dissertation is 1% ink and 99% pulp.’’
– D. von Tischtiegel

Files in the compiler		
File	Description	Page
`accumulator.pl`	Extended DCG preprocessor	225
`accumulator_cleanup.pl`	Cleanup file needed for preprocessor	231
`analyze.pl`	Dataflow analyzer	232
`clause_code.pl`	Clause compiler	260
`conditions.pl`	Formula manipulation utilities	281
`compiler.pl`	Top level of compiler, includes type enrichment	302
`expression.pl`	Compile arithmetic expressions	319
`factor.pl`	Factoring transformation	321
`flatten.pl`	Flattening transformation	331
`inline.pl`	Inline replacement	334
`mutex.pl`	Mutual exclusion and implication of formulas	336
`peephole.pl`	BAM transformations (except synonym)	354
`preamble.pl`	Part of standard form transformation	371
`proc_code.pl`	Predicate compiler	376
`regalloc.pl`	Register allocator	384
`segment.pl`	Head-body segmentation and goal reordering	392
`selection.pl`	Determinism extraction	398
`standard.pl`	Standard form transformation	408
`synonym.pl`	Synonym optimization	414
`tables.pl`	Compilation tables	421
`testset.pl`	List of test sets	431
`transform_cut.pl`	Cut transformation	437
`unify.pl`	Unification compiler	440
`utility.pl`	Utility predicates	457
